

# FRANCISCO MORENO DE LA CRUZ

## Software Engineer

+34 609872744 • franciscomoreno280499@gmail.com • LinkedIn • GitHub • Portfolio • Madrid, Spain

### Summary

Software Engineer with a strong foundation in C, C++, Python, and Unix/Linux. After completing the 42 Madrid Common Core, I discovered a strong passion for backend development, networking, and software architecture. I enjoy understanding how software works internally, solving complex problems, and learning continuously. I am currently seeking my first opportunity as a Software Engineer, where I can contribute my knowledge, continue growing professionally, and keep learning every day.

### Education

|                                                                                         |                   |
|-----------------------------------------------------------------------------------------|-------------------|
| <b>42 Madrid</b><br>Software Engineering                                                | 11/2024 – 06/2026 |
| • C, C++, Unix/Linux, Python, SQL, Docker, Git, TCP/IP, Algorithms and Data Structures  |                   |
| <b>CampusFP</b><br>Higher Technician in Multiplatform Application Development           | 09/2022 - 07/2024 |
| • Python, SQL, Java, PHP, Git, Algorithms and Data Structures                           |                   |
| <b>Complutense University of Madrid</b><br>Software Engineering                         | 09/2019 – 06/2022 |
| • C, C++, SQL, Python, Algorithms and Data Structures, Operating Systems, Statistics    |                   |
| <b>IES Luis de Lucena</b><br>Higher Technician in Industrial Automation and Robotics    | 09/2017 – 07/2019 |
| • Siemens TIA Portal, PLC Programming, Electrical Automation, Pneumatics and Hydraulics |                   |

### Experiencia

|                                                                           |                   |
|---------------------------------------------------------------------------|-------------------|
| <b>Mirelia Digital Talent</b><br>Software Developer                       | 03/2024 – 08/2024 |
| Technology startup focused on software development and digital solutions. |                   |
| • Python, SQL, Docker, Git, Algorithms and Data Structures                |                   |
|                                                                           | Madrid, España    |

### Achievements

|                                                                                                                                                                                                                   |                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>First in My 42 Madrid Cohort</b><br>Finished first in my 42 Madrid cohort with a final score of 12.02, reflecting my commitment to understanding each project in depth and maintaining continuous improvement. | <b>Completed 42 Madrid Common Core</b><br>Successfully completed the 42 Madrid Common Core, passing all exams on the first attempt and developing projects in systems programming, networking, DevOps, and full-stack development. | <b>SKILLS 2018 Winner in Industrial Automation and Robotics</b><br>Won the regional SKILLS 2018 competition in Industrial Automation and Robotics, demonstrating technical knowledge and problem-solving ability in a competitive environment. |
